TE REO O TE TAIAO | *Giving Nature a Voice*

T201 - DOC150 Stainless Steel Trap

Supplier: trapinator.com

URL: <https://trapinator.com/store/Doc-150-Stainless-Trap-p138580351>

The ultimate small and light weight trap for controlling rats, stoats, weasels and hedgehogs in native forests and conservation areas.

- This DOC150 trap is produced in full stainless steel for enhanced corrosion resistance.
- Ergonomically designed to allow for ease of usability.
- NAWAC approved once mounted inside a DOC design trap box.

DR101 - DOC200 Stainless Steel Trap

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/doc200-stainless-steel-trap-only-nawac-approved>

The DOC200 is the tried and tested trap as designed by Phil Waddington and refined in conjunction with the Department of Conservation. This trap is one of the most popular ways of controlling rats, stoats and hedgehogs in native forests and conservation areas.

- This DOC200 trap is produced in full stainless steel for enhanced corrosion resistance.
- Ergonomically designed to allow for ease of usability.
- NAWAC approved once mounted inside a DOC design trap box.

T202 - DOC200 Powder Coated Grey Trap

Supplier: trapinator.com

URL: <https://trapinator.com/store/Doc-200-Powder-Coated-Grey-p138284314>

The DOC200 is the tried and tested trap as designed by Phil Waddington and refined in conjunction with the Department of Conservation. This trap is one of the most popular ways of controlling rats, stoats and hedgehogs in native forests and conservation areas.

- This DOC200 trap is produced in powder coat grey.
- Ergonomically designed to allow for ease of usability.
- NAWAC approved once mounted inside a DOC design trap box.

PTR2056 - BT200 Trap

Supplier: traps.co.nz

URL: <https://www.traps.co.nz/copy-of-pcr-200-trap-zinc-coated-and-stainless-steel>

The BT200 trap is sourced in New Zealand and is an excellent quality replica of the DOC200 trap that was designed by the Department of Conservation for killing stoats, rats and hedgehogs.

The BT200 has achieved a 100% pass and Class A rating for humane control of rats and stoats.

- It is made of zinc coated steel with a stainless steel trigger plate.
- It needs to be placed in a plastic or wooden box to minimise the capture of native birds or pets.
- This trap meets NAWAC guidelines when used correctly.

DR102 / T203 - DOC200 Stainless Steel Trap & Box

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/doc200ss-trap-with-plastic-tunnel>

Supplier: trapinator.com

URL: <https://trapinator.com/store/Mustelid-Tunnel-with-a-Doc-200-stainless--For-Stoats--Rats---Weasels-p122175888>

The Stainless Steel DOC200 trap

- This DOC200 trap is produced in full stainless steel for enhanced corrosion resistance.
- Ergonomically designed to allow for ease of usability.

The Box:

- Made from UV protected plastic and provides easy access to remove pests.

PTR1054 - BT200 Trap & Box

Supplier: traps.co.nz

URL: <https://www.traps.co.nz/bt-200-trap-zinc-coated-and-stainless-trap-in-wooden-box>

A zinc and stainless steel BT200 Trap inside a specially designed wooden box to prevent the capture of non-target species such as native birds.

- Offers a combination of stainless & zinc plated steel for rugged dependability in normal bush conditions.
- Every trap is calibrated and tested prior to shipping to ensure maximum effectiveness.
- The BT200 has achieved a 100% pass and Class A rating for humane control of rats and stoats.

TKT301 - BT200 Stainless Steel Trap & Timber DOC Box

Supplier: taranakikiwi.org.nz

Currently only available to North Island groups

A full stainless steel BT200 Trap inside a locally constructed wooden DOC200 box to prevent the capture of non-target species such as native birds. The TKT build specifications have been approved by DOC and meet their build guidelines.

- Trap is full stainless steel for superior corrosion resistance.
- Screws and mesh are stainless steel.
- Every trap is calibrated and tested prior to shipping to ensure maximum effectiveness.
- The BT200 has achieved a 100% pass and Class A rating for humane control of rats and stoats.

TE601 - TrapEaze Tool

Supplier: trapeaze.shop

URL: <https://www.trapeaze.shop/product-page/trapeaze-tool>

A GAME CHANGER for trappers!

No more fumbling around with safety catches to hold your trap open while you clear your catch. The TrapEaze tool holds the kill bar up which allows you to clear the animal & give your trap plate a thorough clean.

TrapEaze then turns into a hands-free setting tool! Brilliant for people who are nervous to set traps by hand or don't want to touch the trap.

Even the most seasoned trappers will find this tool handy - just for the hook feature alone!

TrapEaze tool is made of quality stainless steel and is lightweight at approx 150gm. Fits in any trapping kit or bumbag at 19.5cm long.

The tools come with a piece of pink flagging tape attached to the handle so they are less likely to get left in the bush!

These are supplied by TrapEaze as either 1 or 2 pieces, please specify which you are after.

Please note TrapEaze is not designed for DOC250 traps.

T205 - DOC250 Stainless Steel Trap

Supplier: trapinator.com

URL: <https://trapinator.com/store/Doc-250-Stainless-p122175906>

Doc 250

The DOC250 is the most powerful trap in the range. This trap is used for the control of ferrets, rats, stoats, weasels and hedgehogs.

- This DOC250 trap is produced in full stainless steel for enhanced corrosion resistance.
- Ergonomically designed to allow for ease of usability.
- NAWAC approved once mounted inside a DOC design trap box.

T206 - DOC250 Zinc Plated Trap

Supplier: trapinator.com

URL: <https://trapinator.com/store/Doc-250-Zinc-Plated-p122175890>

The DOC250 is the most powerful trap in the range. This trap is used for the control of ferrets, rats, stoats, weasels and hedgehogs.

- This DOC250 trap is produced with a zinc plating.
- Ergonomically designed to allow for ease of usability.
- NAWAC approved once mounted inside a DOC design trap box.

TKT302 - BT250 Stainless Steel Trap & Timber DOC Box

Supplier: taranakikiwi.org.nz

Currently only available to North Island groups

A full stainless steel BT250 Trap inside a locally constructed wooden DOC250 box to prevent the capture of non-target species such as native birds. The TKT build specifications have been approved by DOC and meet their build guidelines.

- Trap is full stainless steel for superior corrosion resistance.
- Screws and mesh are stainless steel.
- Every trap is calibrated and tested prior to shipping to ensure maximum effectiveness.

PTR1037 - Victor Modified Victor Stoat

Supplier: traps.co.nz

URL: <https://www.traps.co.nz/modified-victor-stoat-and-rat-trap>

The Victor Modified Rat and Stoat Trap is an effective lightweight trap. It has a bait shroud that ensures rats and stoats interact with the trap and lure from the most effective direction and are dispatched humanely.

- A more cost-effective and lightweight alternative to the DOC 150 and 200 in a wooden box.
- Passes International standards for humanness.
- Suitable for humanely killing stoats and rats.

PTR1027 - Trapinator

Supplier: traps.co.nz

URL: <https://www.traps.co.nz/trapinator-possum-kill-trap>

The Trapinator Possum Trap has proven to be a highly effective possum, ferret and feral cat kill trap. This product is light, durable, portable, and easy to use.

DR103 - Flipping Timmy

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/flipping-timmy-possums-feral-cats>

The often-requested Flipping Timmy possum trap. This user-friendly and effective trap is designed for use by all ages and capabilities. NAWAC approved.

- Maintenance free and will continue to perform at full, humane power for its entire service life. Long-life components made from the highest quality and durable materials.
- 5 year warranty.
- Ergonomic, vertical set.
- Quick reset time. Trap can be cleared, re-baited and set in seconds.
- Flexible baiting system and unique fine setting ability.
- Designed, engineered and manufactured in New Zealand.

DR104 - SA2 by Steve Allan

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/sa2-steve-allan-nawac-approved-for-possums>

The SA2 Steve Allan trap is NAWAC approved for feral cats and possums. Instructions by Steve Allan come with your trap.

To protect ground dwelling birds, use with a wooden ramp as shown in the photo. These should not be used in urban areas where domestic cats are present.

- It is a very strong trap, with a thick treated plywood base and two galvanised hex head wood screws supplied.
- Bait/lure can be chosen to target a specific animal. There is a hook inside the trap that holds the bait.

PTR1036 - Sentinel Possum Kill Trap

Supplier: traps.co.nz

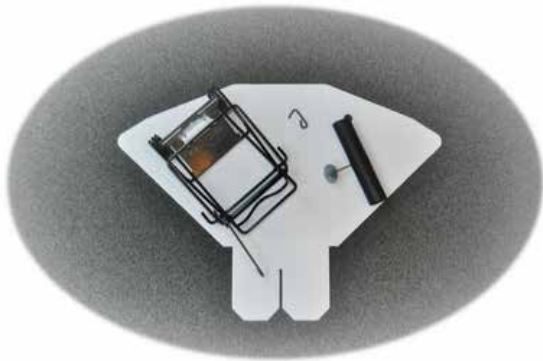

URL: <https://www.traps.co.nz/sentinel-kill-trap>

The Sentinel Kill Trap was developed for Traps.co.nz in 2006 to fill a gap in the possum control industry for a small lightweight portable trap that can be used over large areas. The trap has been used over a large scale by the Department of Conservation.

The Sentinel trap was tested By Landcare Research NZ Ltd using the NAWAC trap testing procedures and found that it passed the New Zealand humane standards for kill traps.

The Sentinel also has a patented rat resistant bait clip attached that stops rats eating the bait so the trap remains baited for several weeks. The Rat resistant bait clip has a New Zealand patent.

RWFB - The F-Bomb

Supplier: rewild.nz

URL: <https://rewild.nz/product/f-bomb/>

The Rewild F-Bomb is a humane animal trap designed and manufactured in Aotearoa New Zealand for the eradication of small mammal pests and predators.

The F-Bomb has achieved NAWAC (National Animal Welfare Advisory Committee) passes for the safe and humane eradication of Ferrets, Stoats, Hedgehogs and Rats, and has also had significant success in the field in the removal of Feral cats and Weasels.

The F-Bomb is a very powerful, yet light weight and safe to use trap. It is the only trap on the market that incorporates an active safety mechanism and capture flag and requires no additional tools or enclosures for safe operation.

The use of the lid as the setting mechanism makes the trap very easy and safe to use, particularly for people that lack strength or who find the more traditional styles of traps to be intimidating or difficult to set.

- Compact - carry up to 6 units comfortably. Light weight (3.7kg)
- 3 year warranty. Durable plastic and Stainless Steel construction
- Factory tested over 5000 cycles
- Adjustable Trigger - factory set to 100g
- Included ground anchors
- Removable bait well and entrance for easy cleaning
- Reduced deployment and servicing costs in large scale projects
- No need for modifying/fixing new devices in-field
- No need for an additional wooden enclosure

N601 - AT220 Multi Species Automatic Trap

Supplier: nzautotraps.com

URL: <https://nzautotraps.com/products/at220-autotrap>

The AT220 is New Zealand's first multi-species, automatic resetting and reluring pest trap. It has proven to quickly and effectively clear pests species with minimal labour costs.

A multi-species trap that eliminates the need for different types of traps NAWAC approved for possums and ship rats with a proven by-catch of other rats, mice, feral-cats and mustelids (stoats, ferrets and weasels).

Automatic resetting and reluring increases kill rates

- Auto-reset for multiple kills (up to 100 resets) with highly effective non-toxic NZAT lure.
- No-touch eye-beam trigger.
- Fresh lure is dispensed automatically every night and the lure trail created over time attracts more pests.

Minimised service intervals (4-6 monthly) saves on labour

- Rechargeable batteries and refillable lure pouch.
- Local trap monitoring via mobile app (Android and Apple).

Protects native species

- Programmed to be inactive during daylight.
- Raised installation on a tree or post restricts potential ground-dwelling species interaction.

Long life in New Zealand environments

- Heavy duty and stainless steel construction with interchangeable components.

PTR1031 - Victor Professional Rat Trap

Supplier: traps.co.nz

URL: <https://www.traps.co.nz/copy-of-victor-professional-rat-trap>

The Victor Professional Rat Trap is recognised as one of the best and most cost-effective traps available. It is ideally suited for rat trapping in our native forests. These traps are supplied by Traps.co.nz in boxes of 12 pieces.

- Large yellow treadle type trigger plate
- Two sensitivity settings;
 - F for Firm where vibrations might set off the trap
 - S for Sensitive for 'smart' rats that may be more difficult to catch
- Bait tray at rear of treadle trigger

Note: Where there is potential for accidentally trapping birds, we recommend the traps are used in conjunction with the Traps.co.nz Kill Trap Tunnel.

DR105 - Victor Power-kill Rat Trap

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/victor-rat-power-kill-each>

- Powerful High-Impact Kill Bar™ for quick, humane kill.
- Simple to use – set and release with just one click!
- Large bait trough for easy bait placement.
- Oversized trip pedal is easily activated for higher catch rates.
- Mounting holes allow for attachment to pipes, beams and other hard-to-access places where rats thrive.
- These traps are supplied by deadrat.co.nz in boxes of 12 pieces.

DR106 - T-REX Rat Trap

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/t-rex-rat-trap-the-original-nawac-test-passed>

The Original T-Rex rat trap. These traps are supplied by deadrat.co.nz in boxes of 6 pieces. NAWAC approved.

- A reusable rat snap trap that effectively incorporates the perfect combination of trap velocity and trigger sensitivity.
- Easy to set. A popular trap choice for programmes where children are involved in the trapping process.
- Top of the trap shelters the bait keeping it drier. Bait cup is removable.

T207 - Reusable Mouse Trap

Supplier: trapinator.com

URL: <https://trapinator.com/store/Mouse-Trap-x-Five-Reusable-p402635371>

One of the strongest mouse traps on the market. These traps are supplied by Trapinator.com in boxes of 5 pieces.

Note: Where there is potential for accidentally trapping birds, we recommend the traps are used in conjunction with a kill trap tunnel.

DR107 - Victor Professional Mouse Trap

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/victor-pro-mouse-trap-x-100>

- Quickly and effectively kills mice.
- Large trip pedal ensures higher catch rates.
- Easy-to-set trigger pedal for quick setup.
- Two settings allow you to control the trigger sensitivity.
- Constructed of Forest Stewardship Council (FSC) Certified wood.
- Made in USA (with global components).
- These traps are supplied by deadrat.co.nz in boxes of 12 pieces.

DR108 - Victor Power-kill Mouse Trap

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/victor-mouse-trap-power-kill-12-pcs>

- High-Impact Kill Bar for quick, humane kill.
- Simple to use – set and release with just one click!
- Large bait trough for easy bait placement.
- Trip pedal is easily activated for higher catch rates.
- These traps are supplied by deadrat.co.nz in boxes of 12 pieces.

PTR1029 - Kill Trap Tunnel

Supplier: traps.co.nz

URL: <https://www.traps.co.nz/pcr-kill-trap-tunnel-for-stoats-weasels-and-rats>

A corflute tunnel designed to prevent bird captures when using the Victor Professional Rat Trap and the Modified Victor Stoat and Rat Trap.

This tunnel is made from robust 3 mm corflute plastic, and it can withstand the weight of rocks and logs placed on it to prevent it from blowing away. The tunnel was designed to house the Victor Professional Rat Trap and the Modified Victor Stoat and Rat trap.

The tunnel is designed to prevent the capture of native birds such as Weka and Kiwi when using the Victor trap. The tunnel has four lugs with holes so that stakes can be used to hold the tunnel down to prevent it blowing away. We recommend using 4-inch flathead nails for this purpose provided the ground is soft.

- A robust tunnel designed to prevent the capture of native birds when using the Victor Professional Rat Trap and the Modified Victor Stoat and Rat Trap.
- Made from strong 3 mm corflute plastic sheet.
- Only weighs 115 g compared to over 2 kg for similar wooden tunnels.
- Ensures the rat or stoat approaches the trap from the front so that body captures do not occur.
- Supplied with 4 pins/pegs to fix the tunnel in place.

DR109 - Supervisor MAX, yellow trap with hood

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/supervisor-max-rat-trap-adjustable-for-rats-mice>

Stainless steel rat / mouse trap with a long funnel style hood. 5 year warranty by Envirottools NZ manufacturer. The hood comes down over the trap to keep kids, pets, native birds away from the trap. The hood will not open up unless the trap is not set!

- Easy to use.
- Multi rodent capability – rat or mouse mode can be selected.
- Hands clear operation allowing safe and hygienic handling and clearing of traps.
- Safety latch system for complete security of pets and children.
- Maintenance free and engineered to always perform at 100%
- Screw mounting and releasable cable tie mounting options for permanent fixing. Screws and cable tie included.
- Electronic monitoring compatible.
- All trap components are made from quality stainless steel and engineering plastics.

T208 - Mouse Station - Trap & Tunnel

Supplier: trapinator.com

URL: <https://trapinator.com/store/Mouse-Station-p666535888>

This reusable mouse trap comes with it's own housing.

- Easy to use and set up.
- Comes with a secure lid that you release with a special key to open.
- One Peanut lure is also included.
- Cover makes it child and pet safe!
- Just pull the black cord to set.

PTR1009 - Live Capture Cage Trap - Large

Supplier: traps.co.nz

URL: <https://traps.co.nz/products/cage-trap-large-ptr1009>

The trap is triggered by the animal stepping onto a treadle while trying to access the bait at the back of the trap. This results in the spring loaded door closing making it impossible for the animal to escape.

- Size assembled: 28 x 32 x 79 cm
- Size collapsed: 6.5 x 31 x 93 cm
- Treadle activated.
- Large trap suitable for capturing cats and possums.
- Locking door to prevent animals escaping.
- Galvanised wire for long-life.
- Set live capture traps are required to be checked within 12 hours of sunrise, as per the Animal Welfare Act.

DR110 - Black Trakka Monitor Tunnel

Supplier: deadrat.co.nz

The Trakka tunnel consists of a lightweight polypropylene tunnel, supplied with two U-shaped pins to secure. Tunnels are 500mm long and supplied in packs of 10.

For use with a pre-inked tracking card, these cards are supplied separately.

Black Trakka tunnel features include:

- Lightweight, durable tracking tunnel.
- Easy to use with minimal training.
- Easily transported in large numbers.
- Can be used to identify many animals and insects.

DR111 - Black Trakka Ink Cards

Supplier: deadrat.co.nz

A pack of 50 pre-inked tracking cards.

For use in the Black Trakka monitor tunnel, these tunnels are supplied separately.

- Cards are easy to read and tracks are easily identifiable.
- Ink is non-toxic to animals.
- Long lasting ink – effective for up to 4 weeks.
- Black Trakka cards can be resealed and re-used if not tracked.

PFS1040 - Chew Cards - Aniseed - High Density

Supplier: traps.co.nz

URL: <https://traps.co.nz/products/high-density-chew-card-aniseed-pfs1040>

Chew-Track-Cards or Chew Cards (CTCs) are a multiple species detection device specifically designed to cheaply map the distribution of low density small mammalian pests, principally possums but also rats mice and other pest species. It is an interference device, left in the field for about a week, which identifies animals present by tooth impressions made as they eat the bait material (possum dough) applied to the cards.

- The cards are a 9 x 18 cm rectangles, made of 550 g/m² white plastic coreflute. Attractant Possum Dough lure is applied to the internal channels at either end of the card.
- Contain highly palatable and long-lasting possum dough developed by Mike Holden.
- Will last at least 6 months under normal storage.
- These are supplied by traps.co.nz in boxes of 100 pieces.

PFS1041 - Chew Cards - Peanut - High Density

Supplier: traps.co.nz

URL: <https://traps.co.nz/products/high-density-chew-card-peanut-pfs1041>

Chew-Track-Cards or Chew Cards (CTCs) are a multiple species detection device specifically designed to cheaply map the distribution of low density small mammalian pests, principally possums but also rats mice and other pest species. It is an interference device, left in the field for about a week, which identifies animals present by tooth impressions made as they eat the bait material (possum dough) applied to the cards.

- The cards are a 9 x 18 cm rectangles, made of 550 g/m² white plastic coreflute. Attractant Possum Dough lure is applied to the internal channels at either end of the card.
- Contain highly palatable and long-lasting possum dough developed by Mike Holden.
- Will last at least 6 months under normal storage.
- These are supplied by traps.co.nz in boxes of 100 pieces.

P501 - Philproof® Multi-Pest bait stations

Supplier: philproof.co.nz

URL: <https://philproof.co.nz/philproofr-multi-bait-station.html>

The Philproof® Multi-Pest bait station is the first bait station that can be used to specifically target different pests. No other bait station can be used to target possums and rodents separately and safely, while keeping your bait dry and out of reach of the non-target animals. This bait station combines the best features of the popular Philproof® mini possum and rodent bait stations.

- Unique reversible floor allows the targeted control of different pest species
- Designed to accommodate block, pellets, paste or soft bait sachets
- Waterproof design keeps bait dry until it is consumed. Even rats won't eat wet soggy bait so keeping it dry saves money
- Target multiple species - possums, rats and mice, and it can be used to poison feral cats and mustelids with the right bait*
- Can be secured to trees, posts or pinned to the ground
- PF2050 recommends at least 5 bait stations per Hectare for rodent control
- Holds up to 800g of pelleted bait and multiple blocks (depending on brand)
- Each bait station comes with fixings and guidelines
- Made in Hamilton since 1995

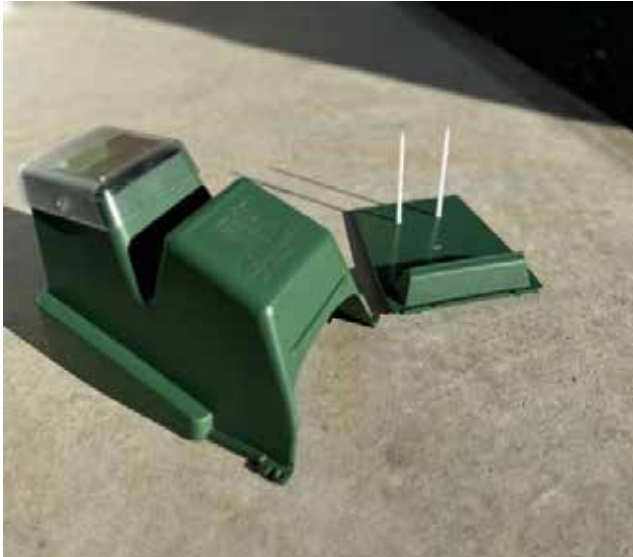

These are supplied by philproof.co.nz in boxes of either 3 or 10 pieces, please specify which you are after.

*A CSL may be required.

P502 - Philproof® Clearview Tamperproof rodent bait station

Supplier: philproof.co.nz

URL: <https://philproof.co.nz/rodent-bait-station-tamperproof.html>

The Philproof® Clearview rodent bait station has been designed for ease of use in areas that require regular and routine inspection of rodent bait.

Predominately used with block bait, replacing bait is as easy as removing the clear lid and adding more to the Internal spikes that hold bait in place and prevent rodents from stockpiling bait. It can hold multiple bait blocks, depending on the brand. Alternatively, pelleted bait can be used, as the internal baffles prevent spillage.

The spikes are ribbed, preventing the bait from falling off in the event the bait station is knocked over.

Philproof® Tamperproof bait stations should be installed by screwing the station to the floor using the lugs provided on the bait station.

Features

- No key needed - removed the friction of checking and refilling bait
- Top quality, this is the industry leading bait station designed for harsh New Zealand bush conditions.
- Waterproof, protect your bait by keeping it dry.
- Internal baffles stop bait from spilling onto the ground.
- Stackable and light, making transport in the field easier.
- Easy to refill, squeeze the top and pull off the clear lid
- These are supplied by philproof.co.nz in boxes of 5 pieces.

T209 - Aniseed Attraction - 1kg

Supplier: trapinator.com

URL: <https://trapinator.com/store/Possum-Aniseed-Attraction-1kg-p534535437>

Specially formulated to attract possums with its irresistible aniseed scent, this lure is a must-have if possum control is your main concern.

Here's how to use it for the best results: Apply a generous amount to the bait block. Add some lure to the trunk of the tree or post just below the trap. Then, simply set the trap and let the Possum Lure Aniseed Attraction work its magic.

Watch as possums are drawn in by the alluring scent, making your trapping efforts more effective than ever.

DR112 - Possum Dough - Aniseed - 2kg

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/possum-dough-5kg/v/DR-POS%20DO%202kg>

A strong smelling sweet aniseed lure that is very pliable.

- Water resistant, will stand up to a large amount of rainfall.
- Will last for months in a sealed container.
- It lasts a long time without moulding when used in the field.
- Non-toxic.
- Sold in a convenient plastic pail with a snap-on lid to help keep dough fresh for longer.

Developed by Mike Holden for fur hunters and possum control contractors.

This lure is like play dough so it sticks and moulds for these uses:

- KILL TRAPS: On bait bar, bait plate or on triggers of kill traps
- LEG HOLDS: On trees and posts behind leg-hold traps
- BAIT STATIONS: Place inside bait stations to lure rodents.

PBL1012 - Possum Dough - Aniseed - 5kg

Supplier: traps.co.nz

URL: <https://traps.co.nz/products/possum-dough-5-kg-pbl1012>

Possum Dough was developed by the famous pest control inventor Mike Holden. Mike developed the product because there was a demand in the market for a product that fur hunters and possum control contractors could use to stick onto control devices such as the triggers of kill traps, inside bait stations or on trees and posts behind leg-hold traps.

The stickiness helps prevent the lure falling onto the ground or being washed away by the rain as occurs when using simple flour and icing sugar lures. It is also excellent for possum and rat detection devices such as chew-cards.

It is highly palatable to possums and rats to the point where they will eat away all the bark on the tree where the lure was attached. This Possum Dough is the ideal bait to stick onto control devices to draw in possums and rats.

- Specially formulated so that it adheres to trap triggers, bait stations and trees and posts.
- Highly attractive to possums and rats.
- Water resistant, will stand up to a large amount of rainfall.
- Will last for months in a sealed container.
- Does not go mouldy when used in the field.
- Stored in a convenient plastic pail to help keep dough fresh for longer.

T210 - Smooth Cinnamon Lure - 1kg

Supplier: trapinator.com

URL: <https://trapinator.com/store/1-kg-Cinnamon-Possum-and-Rodent-Lure-p209128046>

1kg Smooth Possum & Rodent Lure.

Tastes so good that they just want more.

Place some leading into the entrance of the trap and on bait block.
Job done!

T211 - Salmon Lure - 500mL

Supplier: trapinator.com

URL: <https://trapinator.com/store/Salmon-Lure-500ml-p375324049>

Trapinator Salmon Lure 500ml is a great attractant for Stoats, Weasel and Ferrets.

Trapinator Salmon Lure comes with a spray pump to make dispersing the oil easier. Spray leading up to your tunnel entrance and inside your trap.

T212 - Eggsellent Stoat & Rodent Lure - 500g

Supplier: trapinator.com

URL: <https://trapinator.com/store/500g-Eggsellent-Lure-for-Possum-Stoats-Rodents-p228211427>

Eggsellent has got you covered for Possum, Stoats and Rodents.

This irresistible lure will have these pests caught in no time.

Store in the refrigerator when not in use.

DR113 - Fishy Cubes - 1kg

Supplier: deadrat.co.nz

URL: <https://deadrat.co.nz/shop-%26-order/ols/products/lure-mustelid-cat-1kg-soft-blocks-hole-in-middle/v/DR->

Fishy cube lure for mustelids, feral cats and rats.

This lure doesn't need to be refrigerated, and won't go moldy quickly.

- Lure size is 2 x 2cm by about 4cm long, see photo.
- Approx 70 lures per kg.
- Lasts 5 weeks outdoors. Water-resistant.
- Has a long shelf life in a pest-resistant plastic pail.
- A highly effective water resistant lure for kill traps and cage traps.

For use with most traps: DOC 200, Flipping Timmy, Timms, Sentinel, Rat Traps bait cup, Modified Victor.

Blocks are about 4cm long with a small hole in the centre, making it adaptable for many different traps.

PBL1015 - Mustelid and Cat Lure - 2kg

Supplier: traps.co.nz

URL: <https://traps.co.nz/products/mustelid-and-cat-lure-2kg-pbl1015>

Many conservation organisations use the Mustelid and Cat Lure to enhance their trapping programmes. Use as a replacement to eggs or meat which only last a few days before going rotten.

- Increase catch rates substantially.
- Bait is robust and water-resistant.
- Continually attractive day after day.
- High potency scent attractant specific to mustelids and cats.
- Convenient hole in the centre to attach to traps using a wire or metal spike.
- Will last for at least 3 weeks in the field.
- Very long shelf life.
- Each lure weighs approximately 10g.
- Available in a convenient and rodent proof storage container.

PBL1016 - Mustelid and Cat Lure - 10kg

Supplier: traps.co.nz

URL: <https://traps.co.nz/products/mustelid-and-cat-lure-10-kg-pbl1016>

Many conservation organisations use the Mustelid and Cat Lure to enhance their trapping programmes. Use as a replacement to eggs or meat which only last a few days before going rotten.

- Increase catch rates substantially.
- Bait is robust and water-resistant.
- Continually attractive day after day.
- High potency scent attractant specific to mustelids and cats.
- Convenient hole in the centre to attach to traps using a wire or metal spike.
- Will last for at least 3 weeks in the field.
- Very long shelf life.
- Each lure weighs approximately 10g.
- Available in a convenient and rodent proof storage container.

Superior alternative to other lures such as peanut butter which may wash away in the rain or go mouldy.

Many conservation organisations use the Possum and Rat Lure to enhance their trapping programmes.

- Increase catch rates substantially and be active day after day.
- Bait is robust and water-resistant.
- High potency scent attractant.
- Convenient hole in the centre to attach to traps using a wire or metal spike.
- Will last for at least 3 weeks in the field.
- Very long shelf life.
- Each lure weighs approximately 10g.
- Supplied in a convenient rodent-proof storage container.

N602 - NZAT Lure - 2L

Supplier: nzautotraps.com

URL: <https://nzautotraps.com/products/2-litre-lure-and-bottle>

Specially formulated and time proven attractant designed specifically for the AT220 (and other NZAT traps).

A great tasting, non-toxic formulation that has proven to be enticingly effective for not only Possums and rats but other target pests including feral cats and Mustelids e.g. Stoats, Ferrets, and Weasels.

The AT220s are designed to be active in the field for approx. 6 months, but we recommend checking the AT220 after 3 months. This earlier check is often required due to the increased activity of the AT220 when first introduced to areas with high pest numbers.

Always top up the lure in conjunction with regular servicing times.

N603 - NZAT Battery Pack

Supplier: nzautotraps.com

Replacement/ extra battery pack specifically for the AT220 (and other NZAT traps).

Handy to have when servicing NZAT traps.

TTL401 - LureGard™

Supplier: [traptools.co.nz](https://www.traptools.co.nz)

URL: <https://www.traptools.co.nz/products/luregard>

The LureGard™ stops mice from eating your lures, ensuring that your traps remain effective.

The egg shape and colour is highly attractive to stoats and rats and fits into the standard egg holder of conventional traps. It will also protect your lure from the rain.

The white, shiny surface reflects moonlight, making it more visible in dim light and easier for stoats and rats to find your traps at night.

Additionally, it doubles as a convenient scoop for pellet baits.

Upgrade your trapping with this all-in-one lure protection device, and see the difference in your results.

The Luregard eggs are supplied by [traptools.co.nz](https://www.traptools.co.nz) in boxes of 10 pieces.

T214 - Decoy Eggs

Supplier: trapinator.com

URL: <https://trapinator.com/store/Decoy-Egg-p375314311>

Weasels, Stoats, Ferrets, Hedgehogs and Rats love to get their teeth into eggs. Use these Decoy eggs to lure them into your Trap.

These eggs are supplied by trapinator.com in boxes of 12 pieces.

Your Requirements

Please select **up to 3 products** and indicate the quantity that you require. Email these details to admin@giveatrap.co.nz

You can contact the admin via email to change your trap requirements at any time. When a donor gives a trap to your group, the requirements in the system are automatically updated. You will receive an automated email to your group's contact email address when the required quantity is getting low.
